SUMMARY

As a dedicated professional making a career shift from sales to web development, I bring a strong foundation in customer relations, strategic planning, and problem-solving. Though I lack direct experience in web development, my background in sales has equipped me with the ability to adapt quickly, learn new skills efficiently, and work effectively in fast-paced environments. I have 2+ years' experience through self-paced and with bootcamps of web development. I am eager to undergo training and immerse myself in the field of web development, with a commitment to continuous learning and contributing to innovative projects.
